CAMIÓN DE BASURA

Los hay de muchísimos tamaños y diseños pero cada día están mejor preparados. Pueden, desde usar GPS para no saltarse ningún contenedor, hasta recoger 2 fracciones de la basura diferentes al mismo tiempo (generalmente papel y envases), gracias a que tienen 2 depósitos de basuras separados. Los más habituales podrían transportar un elefante con facilidad!

ACTIVITY AND DESCRIPTION	AIMED AT					
	PRIMARY					
	1º	2º	3º	4º	5º	6º
<i>“Jigsaw puzzles: Recycling team”</i> In this activity you can find 8 fun puzzles to learn how to recycle.						
<i>“Learn how to reuse”</i> The reuse of materials is an activity that we can put into practice by making toys with reused elements that we can find at home.						
<i>“By pairing we recycle”</i> With this simple image pairing game we can learn to recycle						
<i>“By pairing we reduce the waste production”</i> With this simple image pairing game we can learn to generate less waste.						
<i>“Where do I put each piece of waste?”</i> A personalised game for each of the different collection systems in each of the municipalities. The pupils will have to drag different types of waste to the corresponding container.						
<i>“Waste transformation processes”</i> With this activity they will learn in a very fun and visual way how the materials we throw in the containers are transformed into other products.						
<i>“Waste quiz”</i> With this quiz you can test your relatives and see how much they know about waste and at the same time learn and have fun together.						
<i>“Recycling Pictionary, Taboo and Password games”</i> By means of a series of cards we can play any of the 3 games as a family and learn interesting facts about waste prevention and management.						
<i>“Videos, texts y news”</i> A group of videos, texts and news related to waste, climate change or circular economy are presented. Each of them defines the duration, the recommended educational level, as well as a short questionnaire on the contents of the videos.						
<i>“Waste word search” (Pasapalabra)</i> In this activity you can play the waste pasapalabra and compete with your family or friends to see who knows the most and who can solve the roulette wheel the fastest.						
<i>“Waste-free shopping”</i> In this interactive presentation, students will have to complete their shopping list by scrolling through a virtual supermarket. They will be presented with various shopping options and information about the pros and cons of each option.
